KIRAN BHASKARAN

HEAD OF SOFTWARE ENGINEERING | DIGITAL TRANSFORMATION | AI INTEGRATION | GLOBAL TEAM LEADERSHIP
: +1 412 370 6402 | : kiran.bhaskaran@gmail.com | linkedin.com/in/kiranbhaskaran

*Accomplished **Engineering Leader** with **18+ years** of progressive experience in the **Healthcare and Nuclear industry** driving enterprise **Digital Transformation** specializing in architecting **cloud-native SaaS platforms** and pioneering **Generative AI solutions** for operational efficiency and product innovation within **high compliance environments**. Proven track record of building and mentoring **global high-performance engineering organizations** with extensive Agile and continuous improvement experience to deliver innovative technology and **enterprise solutions** to market.*

Career Highlights

- Spearheaded the design, development, and delivery of Westinghouse's pioneering **enterprise-grade GenAI SaaS platform, bertha™** catalyzing successful adoption across global internal business units and **external clients**.
- **Partnered with Google** to deliver the AP1000 construction de-risking MVP for the Paris WNE Conference (Nov 2025), successfully demonstrating breakthrough impact and establishing Westinghouse's **Nuclear AI leadership**.
- Architected Westinghouse's first fully **automated Web Application Platform** enabling robust, scalable cloud application deployment and accelerating product velocity by **reducing lead time by more than 80%.**
- Developed an enterprise-level test automation framework at Westinghouse, considerably **reducing the application testing time by 70%** and improving the quality, cost, and delivery time of products to market.
- Established a **robust CI/CD pipeline** at Westinghouse speeding up the secure delivery of Digital Solutions to market.
- Implemented **Zero-Trust Security architecture** across the LMS product suite at Premier.
- Architected the **Ecommerce API framework** at Premier enabling secure payments across the LMS product suite.
- Developed the Agile Delivery Model for the LMS product at Premier improving **client on-boarding efficiency by 60%.**
- Led **cross-functional, multi-site teams (US/India)** collaborating with Executive Leadership to deliver critical product releases, supporting a **$15M product revenue stream** within Premier's business portfolio.
- Awarded **Best Performer at Premier Inc**. (2019) for exceptional leadership and technical execution.

Professional Experience

Westinghouse Electric, Inc, Pittsburgh, PA **Jan 2022 - Till Date**
Role: Head of Software Engineering

- Architected and scaled a **diverse**, **global digital engineering organization** across the **Americas** and **EMEA**, driving high performance and fostering a culture of technical excellence through proactive mentorship of a multi-disciplinary team of managers, software engineers and QA engineers.

- Directed the design, development, and deployment of scalable, high-availability **SaaS** and **Generative AI** solutions across multi-cloud environments (MS Azure and GCP), ensuring enterprise-grade robustness.

- Orchestrated a **CI/CD transformation** by architecting a Kubernetes-driven ecosystem, accelerating the product delivery cadence by **slashing time-to-market by more than 80%** enhancing operational agility.

- Advanced the organization's **DevSecOps maturity**, achieving a **70% reduction in vulnerability exposure** by integrating automated security protocols and comprehensive QA coverage.

- Partnered with Business Units and Product Management as a core member of the cross-functional leadership team to synchronize strategic roadmaps, ensuring technical feature prioritization directly **accelerating long-term commercial objectives (bertha™, AP 1000 de-risking MVP, Techno-bricks).**

Premier, Inc, Pittsburgh, PA **Sep 2015 – Dec 2021**
Role: Sr Software Engineering Manager

- Spearheaded the **organizational restructuring** of the Learning Management System (LMS) engineering division moving to a **hybrid onsite-offshore model** resulting in a **60% reduction in cost and time savings**.

- Designed, developed, and delivered first of its kind in market end to end digitalized Performance Improvement Module (PIM) for physicians in record time. This is a crown jewel project built from vision to success in less than 10 months which resulted in **multi-millions** in **treasury**.

- Architected the design of web ecosystems, ensuring 100% alignment with regulatory mandates including **PCI**, **SOX**, **HIPAA**, **PII**, and accessibility standards like **AODA** while maintaining seamless **audit readiness**.

- Institutionalized **DevSecOps excellence** by embedding automated security gates—including **SAST, DAST, and SCA**—within the CI/CD pipeline, establishing a continuous compliance posture that **mitigates architectural risks in real-time**.

- Architected a dedicated **Site Reliability Engineering (SRE) function**, institutionalizing rigorous **SLAs/SLOs** that secured **99.9%+ uptime** for mission-critical enterprise systems and engineered a resilient infrastructure to support **seamless global scaling**.

CECity Inc, Pittsburgh, PA **Dec 2013- Aug 2015**
Role: Software Engineering Manager

- Orchestrated a multi-year **architectural transformation**, decoupling legacy SaaS monoliths into a modern **microservices ecosystem**; pioneered a containerized Angular SPA framework that **accelerated time-to-market by 40%** and significantly elevated platform performance.

- Institutionalized a **mobile-first architectural standard** for all web properties, optimizing end-user engagement through a consistent, **responsive UI/UX framework** that significantly enhanced brand cohesion and accessibility.

- Engineered an enterprise **observability framework**, centralizing log aggregation and real-time data visualization Leveraged advanced analytics to shorten **MTTR** (Mean Time to Recovery) and enhance system-wide monitoring.

- Established a **TDD** approach across Engineering teams that dramatically **reduced** post-release defects by 30%.

CECity Inc, Pittsburgh, PA **Jan 2007- Nov 2013**
Role: Sr Software Engineer

- Led the development and **go-live** of highly scalable, and responsive **ecommerce** web applications.

- Architected an **IVR solution** using Voxeo as part of the LMS product suite for patients to easily take surveys.

- Architected the **Ecommerce API framework** that included payment gateway implementations for PayflowPro, Chase Paymentech, Authorize.net and Cybersource enabling payments processing within the LMS product.

- Developed a comprehensive enterprise level **test automation framework** using Selenium WebDriver.

- Designed and developed the **SSO** solution using industry leading identity propagation models (**SAML 2.0**).

- Performed a current state **architecture** and **technology stack assessment** and provided recommendations for architecture simplification and new technologies.

Orthosynetics (formerly Orthodontic Centers of America), Metairie, LA **Jan 2005- Dec 2006**
Role: Sr Software Engineer

- Designed and developed several key modules in the rewrite of the company's flagship practice management product "Walrus" leveraging the CSLA.Net framework for improved application responsiveness
- Created several re-usable custom user widgets/controls to speed up application development.
- Responsible for application database design and tuning scripts for increased performance and scalability.
- Led the support team to troubleshoot and remediate production issues by meeting SLA requirements.
- Authored comprehensive technical design specifications and architectural blueprints that included full-stack system diagrams, data entity models, and entity-relationship diagrams.

Education & Certifications

- **Master of Science (MS), Computer Science, University of South Alabama, Mobile, AL, USA**
- **Bachelor of Technology (B.Tech), Electrical Engineering, College of Engineering, Trivandrum, Kerala, INDIA**
- **Six Sigma Green Belt**
- **Professional Scrum Master**

Skills Matrix

Management	Digital Transformation, Agile Methodologies, Product Development/ Delivery, Change management, Planning/Estimation, Budgeting & Costing, Project Scheduling
Core Solutions Expertise	SAAS, AI Engineering, Generative AI, Application security, and Infrastructure/Operations architecture
Cloud Computing/Services	Microsoft Azure, Google Cloud
DevSecOps (CI/CD)/SRE	Microsoft ADO, TFS, GIT, Docker, Kubernetes, Terraform, Selenium, Silk Performer, GHAZDO, MS Defender, Checkmarx, Blackduck, Burp Suite, Rapid7, New Relic, SolarWinds, JIRA, MS Teams, Service Now
Web Front-end/UI Frameworks	React, Svelte, Angular, Typescript, NodeJS, JavaScript, ASP.NET, Html, CSS
Languages/API/Architecture	C#, Java, VB.Net, C++, C, Shell, REST API, Microservices, SOAP
RDB/NoSQL/ORM/Big Data/BI	MS-SQL Server, Oracle, MongoDB, Milvus, Cosmos DB, EF, Hadoop, MicroStrategy
Server/Message broker/Caching/Search	IIS, Tomcat, RabbitMQ, Redis, Memcached, Elastic Search
Authentication & Authorization	Microsoft Entra ID, SAML 2.0, OAuth 2.0
